NEW WALKER-EU.COM WEBSITE OFFERS LEADING-EDGE TECHNICAL TOOLS, PRODUCT INFORMATION

Walker Emissions Control Site Serves as Comprehensive Resource on Catalytic Converters, Diesel Particulate Filters, Diagnostic Processes

Frankfurt, Germany, 16 September, 2014 – Tenneco's Walker® Emissions Control brand has launched a dynamic new website – www.walker-eu.com – designed to serve as a comprehensive technical resource for vehicle service providers and parts professionals. The new site includes an array of leading-edge technical assistance tools as well as extensive information of the full range of Walker replacement components, including catalytic converters, diesel particulate filters, silencers, pipes, fuel borne catalyst additives, and mounting hardware.

Among the new information available through www.walker-eu.com is an extensive introduction to the brand's "Evolution" range of replacement diesel particulate filters. Economical new Walker "EVO C" DPF units feature advanced cordierite technology that is appropriate for millions of well-maintained older vehicles, while Walker "EVO S" silicon carbide filters match the technology used by many vehicle manufacturers.

Service and parts professionals seeking the right replacement emissions control components for any vehicle can rely on the site's 360-degree product images, available through a direct link to the Walker electronic catalogue. The site also includes a link to the powerful new TADIS™ (Technician's Advanced Digital Information System) learning tool – comprising interactive training modules,

technical videos, diagnostic and installation tips, and much more – as well as to the popular “Tenneco TV” online technical video library.

“Because every minute counts when it comes to accurately and efficiently diagnosing and repairing today’s vehicles, our new website is designed to serve as an all-encompassing resource that helps professionals save time,” said François Vandenbroucke, Tenneco senior product manager, emissions control, Europe Aftermarket. “Each of the tools now available through this site is continually updated to remain in step with the changing demands of the emissions control marketplace.”
